Dear Danny:

Thank you again for doing a great job for me. As you recall, I needed:

- McAfee and its related registry entries deleted
- A replacement virus solution
- A backup, external hard drive solution
- A memory upgrade

You did exactly what you said. You came when you said. You did it for the price you said, which was fair. And you did it right the first time.

I highly recommend anyone who needs computer repair, upgrading, or new equipment to you and your company, Danny. Thank you again.

Sincerely,
Robert Mohon
